

APG CASH DRAWER

APG CASH DRAWER®

APG's Series 6000C family of rugged, attractive cash drawers provide a unique workstation foundation for POS applications such as automotive, specialty retail and convenience stores that demand a sharp, low-profile look and rugged, full-featured performance.

Up front, all Series 6000C drawers offer dual media slots with spacious media storage and innovative under-till coin roll storage (photo inset above). These features improve your cash management capabilities. A tough steel-backed plastic drawer front presents a softer, eye-pleasing alternative to metal.

Choose from three Series 6000C cash drawer products to meet your cable management and system configuration needs. The three products in the Series 6000C family give you a range of features and sizes to satisfy your POS form, fit and function requirements.

**Basic** - Fits narrow counter tops (16.7" deep) while providing the top surface to place your POS peripherals.

**Utility** - A depth of 20" provides more surface area for placing the POS peripherals. Cable routing and storage are provided in the rear of the drawer for ultimate organization.

**POS-Partner** - The foundation for the POS-Partner System, this drawer creates a clean installation by providing ample storage for cables and power supplies and various cable routing options.

## Series 6000C

APG's Series 6000C - A POS cash drawer that works as good as it looks.

**Build on a Solid Foundation®**

# APG SERIES 6000C Cash Drawer
