

APG CASH DRAWER®

Cashlogy® POS1000US

CASH RECYCLING SOLUTIONS

Retail-Ready Cash Recycling

APG Cash Drawer and Azkoyen Payment Technologies have partnered to deliver the Cashlogy® POS1000US. The Cashlogy® POS1000US recycler is designed to offer unprecedented levels of performance and is built for retail, restaurants, quick serve, supermarkets, bakeries, gas stations, & C-stores.

Cashlogy provides closed loop end to end cash management - cutting management costs and boosting customer service. Customers can pay directly into Cashlogy with notes and coins against the POS transaction value, eliminating counting errors, shrinkage and minimizing potential theft. Cashlogy sorts and stores by denomination and automatically recycles cash as change to the customer. Automated cash counting at the point of sale not only speeds up the payment process per transaction but also means that the end of day cash will always balance saving valuable time and money.

Quality Assured:

Accepts, validates, sorts, stores, and dispenses currency based on transaction data from the POS software. Real-time bill validation rejects "bad" coins and bills.

Counts Cash Fast:

Coins and bills are processed simultaneously to assure fast transactions, rapid coin counting and sorting, while bulk coin with mixed denominations are accepted

Secure Transportation of Bills:

Detections of access door openings, separate keys for each level of access: (cashier, collectors and technician), and locked bill stacker enables secure bill transport

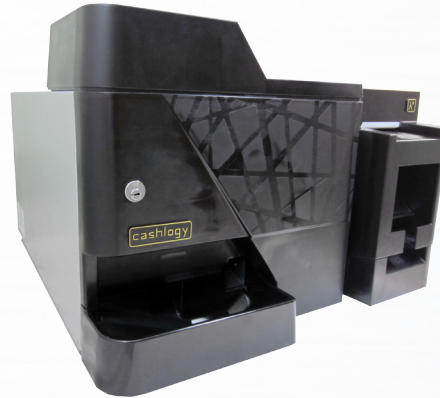

Modular System with Convenient Access:

Easy access to bill stacker and internal components, designed for long life with intuitive and straight-forward maintenance and trouble-shooting.

INSTALL IT. FORGET IT.

Cashlogy, IT'S ABOUT YOUR MONEY
